PROJECT

Food-Delivery-Application | source code: [GitHub](#)

- Developed a full-stack Food Delivery Application using MERN stack.
- Implemented a responsive **client-side** with React and Context API, enabling seamless browsing of food items, order placement, and user account management.
- Designed and integrated an **admin dashboard** using React and Context API for food management, order processing, and sales analytics.
- Engineered secure **server-side** with Node.js, Express.js, MongoDB, JWT, bcrypt, multer, and RESTful APIs.
- Integrated third-party APIs like *Stripe* for payments and *Nodemailer* for transactional emails, ensuring secure and efficient order transactions.

Professional-Portfolio | source code: [GitHub](#) | Link: [MERN Portfolio Website](#)

- Developed a dynamic and responsive portfolio using MERN stack technologies.
- Included features like project showcases, interactive navigation, and a contact form to enhance user engagement.
